

## AD02 Android Enterprise Application Development

Days of Training: 4

### Overview

Mobile based UI applications will be widely used in the future generations. This leads to an enormous opportunity of integrating the mobile applications with existing Enterprise Applications. The architectures and technologies intricacies are handled through Advanced Android Application Development program.

Integrating Advanced Mobile Applications development which brings enormous career scope and knowledge expansion on innovative technologies. This program enables the candidate to develop applications with advanced features and also can consume Web Services. It enhances the skill of the candidate from Android UI App Development to Integrating advanced technologies to the App.

### Prerequisites

AD01 Developing Applications on the Android OS platform

### Price

\$2,200 before GST

### Lesson 1: Getting Started

Introduction to Android Jelly Bean  
What Are The New Features for Application Developers?  
What Was New in Ice Cream Sandwich – Android 4.0  
Design Principles  
Creating Android Apps that Support Different Devices

### Lesson 2: Android Resources and Custom Widgets

Android Resources  
Advanced Widgets  
Overview of Android Components

### Lesson 3: Android Multiple Activities

Introduction to Android Activities  
Creating an Activity  
Implementing a User Interface  
Declaring the activity in the Manifest  
Using Intent Filters  
Starting an Activity  
Data Transfer  
Starting an Activity for a Result  
Shutting Down an Activity  
Managing the Activity Lifecycle  
Saving Activity State  
Introduction to Fragments

### Lesson 4: Android Services & Broadcast Receivers

Introduction to Services in Android  
Creating a Started Service  
Declaring a Service in the Manifest  
Starting a Service  
Stopping a Service  
Binding Between Activities and Local Services  
Implementing the Lifecycle Callbacks  
Sending Intent Data and Bundle to the Services  
Broadcast Receiver  
System Broadcasts

### Lesson 5: Content Providers

Introduction to Content Providers  
Content URIs  
Requesting Access Permission  
Inserting Data  
Updating Data  
Deleting Data

### Lesson 6: Android Multimedia Framework

Introduction to Multimedia Framework  
Audio  
Image/Video Using Camera

### Lesson 7: Android Introduction to Graphics and Animation

Graphics and Animation Overview  
Property Animation  
View Animation  
Drawable Animation  
2D and 3D Graphics  
Canvas  
Drawables  
Accessing Drawables  
XML Drawables

### Lesson 8: Android Data Storage

Introduction to Data Storage  
SQLite and Android  
SQLite Architecture

### Lesson 9: Android Search Functionality

Introduction to Android Search Functionality  
Using the Search Dialog  
Using the Search View Widget

### Lesson 10: Android Web Apps

Introduction to Web  
Targeting Screens from Web Apps  
Using Viewport Metadata  
Android Web Apps Using Web View  
Accessing WebView with JavaScript

### Lesson 11: Android LBS

Introduction to Android Location Awareness  
Determine the Current Geolocation  
Using GPS and Setting the Current Location  
Google Maps  
Install Google Play Services  
Getting the Google Map Key

### Lesson 12: Android Security and Permissions

Security Architecture  
Application Signing  
User IDs and File Access  
Using Permissions  
Declaring and Enforcing Permissions

### Lesson 13: Publishing Android Applications

Get Started with Publishing  
Register for a Publisher Account  
Set up a Google Wallet Merchant Account  
Developers Console  
Selling and Pricing Your Products  
User Reviews and Crash Reports  
App Statistics
