MY INTEREST

I am keen in developing useful **Website(SPA) & Mobile Application** using **ReactJS & React Native** framework in JSX.

Have you ever wonder why **data-intensive** application like **Facebook, Instagram and Airbnb never lags**? This is because they are using **React** framework which only reload the specific component of the page that is changed instead of refreshing the whole page. Their mobile application are built on **React Native** where up to 85% of the code can be shared for both iOS and Android platform, instead of maintaining a Swift code for iOS app and a separate Java code for Android.

I also have great interest in learning **Artificial Intelligence** and **Blockchain** technology.

MAJOR ACHIEVEMENTS / PROJECTS

1. Infocomm Development Authority of Singapore (IDA) ELITE Program (Mar 2013 - Apr 2015)

- AD01 & AD02, Android Enterprise Application Development Courses (Certified)
- ITIL V3, Foundation in Service Management Course (Certified)
- CAPM, Certified Associate in Project Management

2. NUS Summer Orbital Project: NUS Academic Planner (May - Aug 2016)

Modules Planner Website to meet respective degree requirements of user using **Bootstrap** and **Angular.js** framework.

3. CS2103 Software Engineering Module: Savvy Tasker (Aug - Dec 2016)

Developed a Desktop Event/Task Manager Application, using CLI (Command Line Interface) to carry out functions such as searching, filtering, sorting, storing events/tasks and keyboard shortcuts for these functions. Coded in Java and XML.

4. Other major CCA achievements:

- President of Ninjado Martial Arts Club in Ngee Ann Polytechnic (Dec 2012 - Mar 2014)
- Deputy Logistics Director of NUS Student's Computing Club (Sep 2015 - Sep 2016)

RELEVANT WORK EXPERIENCES

1. Asiavoila Digital Signage Overseas Internship (Shanghai) (Sep 2014 - Jan 2015)

Website Maintenance, Enterprise Database Management & Infocomm Sales and Marketing

2. Teaching Facilitator for NUS School of Computing Events

Facilitator for Intro to Coding at NUS for Secondary School Students (May 2016 & Jan 2017)
Facilitator for Poly Students Visit to NUS School of Computing (Jan 2016)
NUS School of Computing Open Day Student Ambassador (March 2016)

3. ezCare Summer Internship & iOS Project (May 2017 - Feb 2018)

Web Application Development using **React & Redux** framework in **JSX** & iOS Application Development in **Swift**.

- Implement iOS Application UI/UX Login Page and Main Landing Page from psd using **Photoshop** and **Swift**
- Design and Implement Customised Push Notification in iOS App using **Firebase**
- Provide Service Recommendation/Suggestion according to user preference in Web App
- Add Filtering and Sorting in Web App's Administrator Management View using **JSX**

ACADEMIC QUALIFICATIONS

1. NUS: Degree in Computer Science (Honour) (Aug 2015 - Jul 2018)

Focus Area: Software Engineering

- **Computing Fundamental:** CS2010 Data Structures & CS3230 Design & Analysis of Algorithms
- **Software Engineering:** CS3219 Principles, Patterns, CS4211 Formal Methods & CS4218 Testing
- **Artificial Intelligence:** CS3243 Introduction to AI & CS3244 Machine Learning
- **Networking:** CS2105 Introduction to Computer Networks & CS4222 Wireless Computing

2. NP: Diploma in Financial Informatics (Apr 2012 - Apr 2015)

- **Enterprise Finance:** Enterprise Information Systems Analysis & Design using SAP & Banking and Finance
- **Information Technology:** Developing Web Application & Database & Business Intelligence
